Rigid Investigation of Morgan-  
ton Institution Reveals No  
Criminal Misconduct.

## NOT PERSECUTE MISS BALL

Teacher Not Hounded Because  
She Testified Against the  
Powers.

(Special to The Times-Dispatch.)

RALEIGH, N. C., June 26.—In view of many inquiries received as to the final disposition of the charges preferred against the management of the State School for the Deaf and Dumb at Morganton, Governor Glenn made a statement to the effect that at the request of certain parties he had ordered an investigation by the Board of Internal Improvement; that sworn testimony was taken, and on this a report was made to him by E. C. Booth, of the board, to the effect that there was no mismanagement, and the institution was in first class condition; but making, however, some suggestions as to changes for the better that could be made. Later, on request, the Governor reopened the matter and heard argument, and, on the suggestion being made that Miss Ball, one of the instructors, had committed suicide because of persecution brought on her because she had testified against the management at the previous investigation, he directed Mr. Beckwith to go into the investigation again, with the result that he reported no evidence to show any mistreatment of Miss Ball.

Considerable friction. He did report that there was evidently considerable friction among the faculty of the institution that should be looked into and remedied. This finding the Governor says he reported to the board of directors with the request that they take any steps necessary to have harmony in all departments of the school.

The Governor did not so state, but it is known that the directors did take steps to his end by dropping from the faculty a number of persons who were known to be at variance with Superintendent Goodwin and his policies.

The Governor said in conclusion that all the sworn testimony in connection with the investigations and the reports thereon are on file in his office, and a careful perusal shows that there has been no criminal misconduct or neglect of duty on the part of Superintendent E. McK. Goodwin; that the institution is doing a great work and deserves to be upheld by the people of the State. And he hopes that any friction heretofore existing may be allayed, and that all the people will unite to build up this humanitarian institution.

Fisher and Radford, with two friends, engaged in a social game of cards yesterday afternoon. The weather being warm, they discarded their coats. Shortly after the game broke up, Mr. Radford discovered that \$25 and a check for \$500, which he had placed in his coat pocket, was missing.

## EX-GOV. HERRICK ON RAILROAD PROBLEM

Tells Ohio Bankers That Severe  
Legislation Is  
Wrong.

## HE QUOTES THE PRESIDENT

Program of Convention at Cin-  
cinnati Interrupted by  
Death.

CINCINNATI, OHIO, June 26.—Death interfered with the program of the Ohio Bankers' annual convention to-day, as United States Treasurer Treat had wired that, owing to the death of the assistant treasurer at San Francisco, he would be unable to attend and speak on "The Currency Question." At the morning session the address of the president, Thomas H. Wilson, of Cleveland, and reports of Secretary S. P. Rankin, Treasurer W. J. Winter, Chairman A. E. Rice, of the executive committee, and Chairman W. F. Hoffmann, of the protective committee, were heard. Appointment of the usual committees and addresses by Professor E. S. Meade, of the University of Pennsylvania, and Judge Henry W. Harter, of Canton, Ohio, completed the program of the opening session.

In the afternoon the first address was on "Legislation and Progress," by Myron T. Herrick, former Governor of Ohio.

## Governor Herrick's Address

Discussing "Legislation and Progress," former Governor Herrick quoted extensively from the address of President Roosevelt at Indianapolis, and emphasized the President's statement that the railroads to-day are not over-capitalized. Railroad managers, he said, are face to face with a situation such as no human foresight could have anticipated. Restrictive legislation, however wise, he said, is inopportune at this time. Continuing, he said:

"Rolling stock, trackage and terminal facilities are entirely inadequate to the demands of the shipper, and to meet such a situation, labor and materials must be secured at the highest cost that has ever obtained, funds must be drawn from a market in which capital is scarce and high-priced, and terminals must be enlarged in cities where the price of land is almost prohibitory. The situation is not local, for there has been a world-wide stretching of credit. If to this is added legislation tending to undermine the faith of the investor in railroad securities, the problem becomes well-nigh hopeless. What then are other causes, the present low market value of securities would indicate that the general attack on these properties has had a tendency to frighten the investor and to depreciate the value of the securities at a time when they should be such confidence as to invite investment. The fact that a few pigs have gotten in the trough is not sufficient reason for poisoning the food on which they fatten."

## Ownership Is Wrong

"It is both proper and right that corporations should be regulated by law, but laws which by their terms give the prerogative of ownership are inconsistent with our form of government. The financial needs of a railroad are usually imperative, and funds must be obtained, whatever the condition of the money market. If the railroad manager is to meet the exigencies of the times he must be given the widest latitude as to the nature of securities and of terms on which they are sold."

# Purity is Supreme

The materials we use are the best we can buy.  
And a partner in our business selects them.

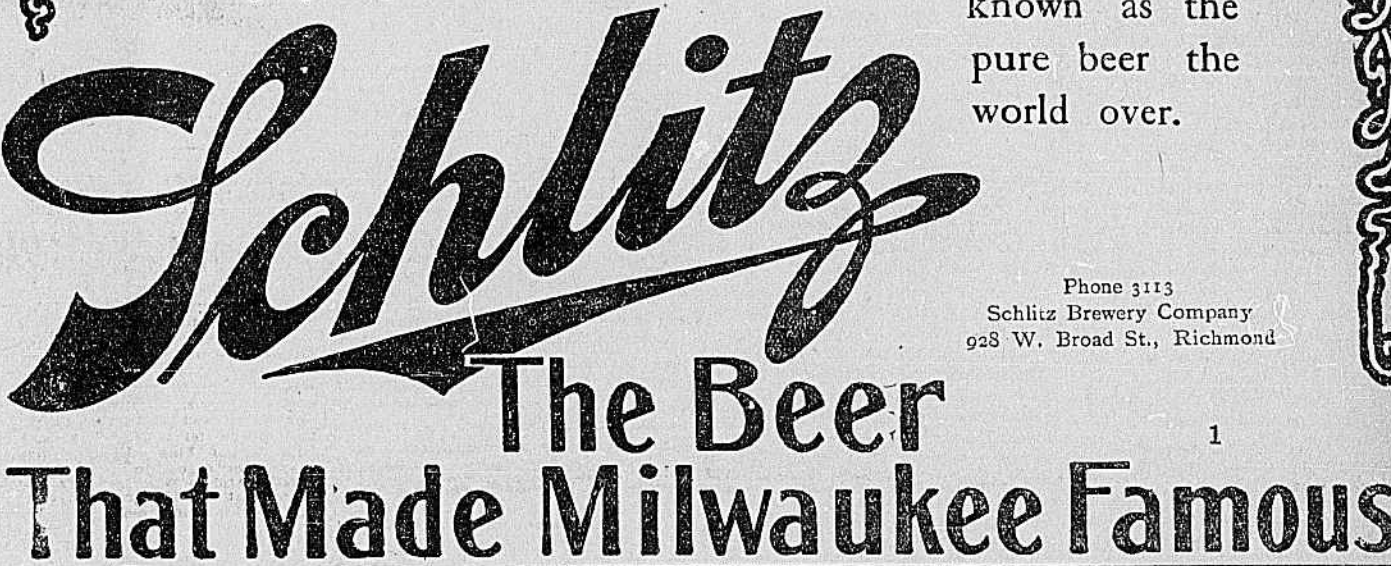

The goodness of Schlitz is due largely to them.

But the supremacy of Schlitz as a home beer has been gained by the fact of its absolute purity.

Purity is not so conspicuous as some qualities in beer, yet it is very expensive. That is why it is rare.

But what does it matter how good a beer is if it is not a pure beer? If its use is unhealthful? If its result is biliousness?

# S.S.S. PURELY VEGETABLE

S. S. S. is recognized everywhere not only as the best of all blood purifiers and the greatest of all tonics, but the one medicine that can be taken with absolute safety by everyone. Young or old, those in robust health, or those whose systems are delicate and run-down, may use it with the same good results, and equally without fear of any unpleasant or injurious after effects. Next in importance to removing the cause of any disease is the condition in which the system is left after a course of medical treatment. Medicines containing mercury, potash or other strong mineral ingredients, often do permanent injury by eating out the delicate lining and tissues of the stomach, producing chronic Dyspepsia, unfavorably affecting the bowels, and so deranging the system otherwise, that even if the original disease had been removed from the system it is left in such a weakened and deranged condition that the health is permanently impaired. S. S. S. enjoys the distinction of being the only blood medicine on the market that does not contain a mineral ingredient of some kind. It is made entirely of the healing, cleansing extracts and juices of roots, herbs and barks gathered directly from the forests and fields of nature, under our own supervision, and when they reach our laboratory contain all their original valuable tonic and blood purifying properties. We offer a reward of \$1,000 for proof that S. S. S. contains a particle of mineral in any form. Being made entirely from these vegetable ingredients S. S. S. is absolutely harmless to the system, and while curing disease adds health and strength to every part of the body. S. S. S. cures Rheumatism, Catarrh, Scrofula, Sores and Ulcers, Skin Diseases, Contagious Blood Poison, and all other blood troubles by removing the cause and supplying the circulation with health-giving and strength-producing qualities.
